Subject Index of Volume 75

Acid dyes

Biological activated carbon treatment of industrial wastewater in stirred tank reactors, 201

Adaptive predictive control

A new strategy for temperature control of batch reactors: experimental application, 11

Affinity membrane

Residence time distribution studies in a simulated tubular affinity membrane separator, 105

Agglomeration

The study of calcium oxalate precipitation using image analysis, 93

Amines

Contributions of additional group interaction parameters through limiting activity coefficient measurements on aliphatic alcohols, aromatic hydrocarbons, ketones and an ester in tetrahydroxy-ethylethylenediamine and tetraethylene pentamine, 87

Batch distillation

RBDOPT: a general-purpose object-oriented module for distributed campaign optimization of reactive batch distillation, 57

Batch processes

Supervision of fed-batch fermentations, 69

Batch reactor control

Towards practical optimal control of batch reactors, 1

Batch reactor

A methodology for on-line setpoint modification for batch reactor control in the presence of modeling error, 21

A new strategy for temperature control of batch reactors: experimental application, 11

Biological activated carbon

Biological activated carbon treatment of industrial wastewater in stirred tank reactors, 201

Biomass

A novel interconnected fluidised bed for the combined flash pyrolysis of biomass and combustion of char, 121

Bubble size

Wavelet analysis of pressure fluctuation signals in a bubbling fluidized bed, 113

Bubbling frequency

Wavelet analysis of pressure fluctuation signals in a bubbling fluidized bed, 113

Calcium oxalate

The study of calcium oxalate precipitation using image analysis, 93

Campaign optimization

RBDOPT: a general-purpose object-oriented module for distributed campaign optimization of reactive batch distillation, 57

Control gains tuning

Control of a fluid catalytic cracking unit based on proportional-integral reduced order observers, 77

Cross-flow

Residence time distribution studies in a simulated tubular affinity membrane separator, 105

Crystallization

Crystal structures and solvent-mediated transformation of Taltireline polymorphs, 193

Drop mass transfer

A possible approach to improving rotating disc contactor design accounting for drop breakage and mass transfer with contamination, 131

Experimental device

Réalisation d'une enceinte réactionnelle isotherme isobare à volume variable Application à l'étude de la stoechiométrie de l'oxydation de la monométhylhydrazine en solution aqueuse strictement monophasique, 213

Falling film

A numerical study of the hydrodynamics of a falling liquid film on the internal surface of a downward tapered cone, 177

FCC units

Control of a fluid catalytic cracking unit based on proportional-integral reduced order observers, 77

Fine chemistry

A new strategy for temperature control of batch reactors: experimental application, 11

Flashing flow

Ecoulement critique d'un liquide en vaporisation à travers une ligne de décharge comportant un orifice, 183

Fluidization

Wavelet analysis of pressure fluctuation signals in a bubbling fluidized bed, 113

Gas chromatography

Contributions of additional group interaction parameters through limiting activity coefficient measurements on aliphatic alcohols, aromatic hydrocarbons, ketones and an ester in tetrahydroxy-ethylethylenediamine and tetraethylene pentamine, 87

Gas-assisted flow

Perturbation method in gas-assisted power-law fluid displacement in a circular tube and a rectangular channel, 167

Hydrodynamics

A numerical study of the hydrodynamics of a falling liquid film on the internal surface of a downward tapered cone, 177

Image analysis

The study of calcium oxalate precipitation using image analysis, 93

Industrial effluent

Biological activated carbon treatment of industrial wastewater in stirred tank reactors, 201

Interconnected fluidised bed

A novel interconnected fluidised bed for the combined flash pyrolysis of biomass and combustion of char, 121

Iterative dynamic programming

Towards practical optimal control of batch reactors, 1

- Jet structures**
Ecoulement critique d'un liquide en vaporisation à travers une ligne de décharge comportant un orifice, 183
- Limiting activity coefficient**
Contributions of additional group interaction parameters through limiting activity coefficient measurements on aliphatic alcohols, aromatic hydrocarbons, ketones and an ester in tetrahydroxyethylethylenediamine and tetraethylene pentamine, 87
- Liquid-liquid extraction**
A possible approach to improving rotating disc contactor design accounting for drop breakage and mass transfer with contamination, 131
- Mixing vessel**
Power consumption measurements in a liquid vessel that is mixed using a vibratory agitator, 161
- Model based control**
A new strategy for temperature control of batch reactors: experimental application, 11
- Model error**
A methodology for on-line setpoint modification for batch reactor control in the presence of modeling error, 21
- Modeling error**
Control of a fluid catalytic cracking unit based on proportional-integral reduced order observers, 77
- Monomethylhydrazine**
Réalisation d'une enceinte réactionnelle isotherme isobare à volume variable Application à l'étude de la stoechiométrie de l'oxydation de la monométhylhydrazine en solution aqueuse strictement monophasique, 213
- Monophasic medium**
Réalisation d'une enceinte réactionnelle isotherme isobare à volume variable Application à l'étude de la stoechiométrie de l'oxydation de la monométhylhydrazine en solution aqueuse strictement monophasique, 213
- Multichoking**
Ecoulement critique d'un liquide en vaporisation à travers une ligne de décharge comportant un orifice, 183
- Non-linear control**
Optimization and non-linear control of a batch emulsion polymerization reactor, 31
- Optimal control**
A methodology for on-line setpoint modification for batch reactor control in the presence of modeling error, 21
Towards practical optimal control of batch reactors, 1
- Optimization**
Optimization and non-linear control of a batch emulsion polymerization reactor, 31
- Orifice**
A novel interconnected fluidised bed for the combined flash pyrolysis of biomass and combustion of char, 121
Ecoulement critique d'un liquide en vaporisation à travers une ligne de décharge comportant un orifice, 183
- Oscillatory flow**
Residence time distribution studies in a simulated tubular affinity membrane separator, 105
- Oxidation**
Réalisation d'une enceinte réactionnelle isotherme isobare à volume variable Application à l'étude de la stoechiométrie de l'oxydation de la monométhylhydrazine en solution aqueuse strictement monophasique, 213
- Peclet number**
Residence time distribution studies in a simulated tubular affinity membrane separator, 105
- Perturbation method**
Perturbation method in gas-assisted power-law fluid displacement in a circular tube and a rectangular channel, 167
- Pharmaceuticals**
Crystal structures and solvent-mediated transformation of Taltireline polymorphs, 193
- PI² compensators**
Control of a fluid catalytic cracking unit based on proportional-integral reduced order observers, 77
- Polyethylene terephthalate (PET)**
Optimization of the pre-polymerization step of polyethylene terephthalate (PET) production in a semi-batch reactor, 47
- Polymerization reactors**
Optimization and non-linear control of a batch emulsion polymerization reactor, 31
- Polymorphism**
Crystal structures and solvent-mediated transformation of Taltireline polymorphs, 193
- Power consumption**
Power consumption measurements in a liquid vessel that is mixed using a vibratory agitator, 161
- Prepolymerization**
Optimization of the pre-polymerization step of polyethylene terephthalate (PET) production in a semi-batch reactor, 47
- Pressure relief line**
Ecoulement critique d'un liquide en vaporisation à travers une ligne de décharge comportant un orifice, 183
- Principal component analysis (PCA)**
Supervision of fed-batch fermentations, 69
- Process chemometrics**
Supervision of fed-batch fermentations, 69
- Process control**
A new strategy for temperature control of batch reactors: experimental application, 11
- Projection to latent structures (PLS)**
Supervision of fed-batch fermentations, 69
- Pyrolysis**
A novel interconnected fluidised bed for the combined flash pyrolysis of biomass and combustion of char, 121
- Reactive distillation**
RBD OPT: a general-purpose object-oriented module for distributed campaign optimization of reactive batch distillation, 57
- Reciprocating plate agitator**
Power consumption measurements in a liquid vessel that is mixed using a vibratory agitator, 161
- Residence time distribution**
Residence time distribution studies in a simulated tubular affinity membrane separator, 105
- Rotating cone reactor**
A novel interconnected fluidised bed for the combined flash pyrolysis of biomass and combustion of char, 121
- Rotating disc contactor**
A possible approach to improving rotating disc contactor design accounting for drop breakage and mass transfer with contamination, 131
- Setpoint profile**
A methodology for on-line setpoint modification for batch reactor control in the presence of modeling error, 21
- Standpipe**
A novel interconnected fluidised bed for the combined flash pyrolysis of biomass and combustion of char, 121
- Statistical process monitoring (SPM)**
Supervision of fed-batch fermentations, 69
- Stirred tank reactor**
Biological activated carbon treatment of industrial wastewater in stirred tank reactors, 201

Successive quadratic programming (SQP)

Optimization of the pre-polymerization step of polyethylene terephthalate (PET) production in a semi-batch reactor, 47

Superheat

Ecoulement critique d'un liquide en vaporisation à travers une ligne de décharge comportant un orifice, 183

Taltireline

Crystal structures and solvent-mediated transformation of Taltireline polymorphs, 193

Transformation

Crystal structures and solvent-mediated transformation of Taltireline polymorphs, 193

Two-phase flow

Perturbation method in gas-assisted power-law fluid displacement in a circular tube and a rectangular channel, 167

Wavelet analysis

Wavelet analysis of pressure fluctuation signals in a bubbling fluidized bed, 113
